

Deelopdracht 1: eigen user story01_edit

As a user I want to be able to edit the information of different users.

Wireframe:

You are logged in as admin

Home	Users	Register
------	-------	----------

Userid: 1

First Name	Ad
Last Name	Director
Email	director@ucll.be
Role	Teamleader
Team	Alpha

EDIT

Acceptance criteria:

- From the overview I should be able to click on the edit button and edit said user.
- I should be able to navigate back to other pages of the website thus cancelling the edit.
- The form should be automatically filled in with the data of the user.
- When the user is successfully edited the website needs to return to the overview.
- When there is an error in the edit form, the website should return to the form showing what was incorrect and filling in the data of the user before edit.

Remark:

- Password cannot be changed from the edit page.
- Userid of the user should be displayed.
